AUTHORS		ARTICLES
J Loboda-Cackovic, M S Mousa and J H Block	**89**	Surface analysis of the PdCu(110) single crystal alloy at different segregation rates

T Iwert, N Schindler and C Edelmann	**97**	The operation characteristics of axial emission ionization gauges similar to the construction of Chen *et al*
T Durakiewicz and S Halas	**101**	A novel electronic circuit for a Pirani gauge
Y Suetsugu	**105**	Numerical calculation of an ion pump's pumping speed
A N Sorokin and A V Svalov	**113**	Magnetic studies of the homogeneity of ferrimagnetic amorphous films
M S Mousa, J Loboda-Cackovic and J H Block	**117**	Characterization of PdCu(110) single crystal surface compositions during CO chemisorption
K Prasad	**127**	Stability of electrical parameters of Ti Schottky contacts on GaAs fabricated surfaces using different surface cleaning techniques
F Muntean, D Ursu and N Lupsa	**131**	Ion trajectory analysis for rf-only quadrupoles
Dao–xuan Dai and I Davoli	**139**	An experimental study of an interface reaction at the practical Pd/Si interface by XPS
M Bouslama, C Jardin and M Ghamnia	**143**	The InSb(100) surface change during the argon ion bombardment and the electron stimulated oxidation
A Pal, J Dutta, D Bhattacharyya, S Chaudhuri and A K Pal	**147**	Electrodeposited CdTe films: Space charge limited conduction
M Zeuner and J Meichsner	**151**	Ion kinetics in collisional rf-glow discharge sheaths
C Edelmann and I Kunz	**159**	Remarks concerning the interpretation of longterm outgassing-rate measurements with the help of the rise of pressure method by the theory of *Malev*
A Verma, K J S Sawhney and R V Nandedkar	**165**	An electromagnetic actuator in uhv for a synchrotron-radiation beam viewer
H Savaloni and M A Player	**167**	Influence of deposition conditions and of substrate on the structure of uhv deposited erbium films
Q Q Yang, L S Wen, X Z Chen, Y Q Zheng and Y Z Zhuang	**181**	A Ti–B–N film formed by EB-ion plating and N ion bombardment of a Ti–B film
Q Q Yang, B J Chen, X Q Wang, Y C Su and S L Li	**185**	A study of the microstructure and properties of diamond film
M K Naparty and J Skonieczny	**189**	The study of epitaxial growth of thin Cu and Ag layers on Ag(110) and Cu(110) using Total Current Spectroscopy, AES and Work Function Measurement
R Campion, R G Ormson, C A Bashford and P J King	**195**	Design and performance of a reliable and low cost substrate heater for superconducting thin film deposition
O S Heavens, G J Kopek and Y Yi-Fang	**199**	Accurate monitoring of dielectric film thickness
J Musil, J Matouš and V Valvoda	**203**	Effect of ion bombardment on the surface morphology of Zn-films sputtered in an unbalanced magnetron
VACUUM DIARY	**i**

Proceedings of the 17th International Seminar on Surface Physics

M Stęślicka and R Błaszczyszyn	**xi**	Preface
AUTHORS		ARTICLES
ADSORPTION		
L Gładyszewski	**407**	Determination of the alkali ions–metal surface interaction energy
J Loboda-Cackovic, A Hammoudeh, M S Mousa and J H Block	**411**	Oxidation of CO on PdCu (110) single crystal alloy catalyst: steady state, hysteresis and related surface phenomena
P Mazur and T Lewowski	**417**	UPS study of KOH layers on Si (100) surface
M W Radny and P V Smith	**419**	An *ab initio* Hartree–Fock study of the B/Si (001) 2 x 1 adsorption system
T P Smereka, S I Stepanovskii and R R Kamenetskii	**425**	The common adsorption of rare-earth elements and oxygen on certain faces of tungsten crystal
T P Smereka, I M Ubogyi and Ya B Losovyi	**429**	The role of electron structure of substrates in interaction of adsorbed atoms on furrow faces of transition metals
L Stobiński and R Duś	**433**	Rate of H_2 atomization over the surface of a hot tungsten filament
ELECTRONIC STRUCTURE		
M Brejnak, J P Julien and D Mayou	**437**	Recursion method solution of coherent potential approximation equations: application to surface alloys
J J Czyżewski and S Klein	**441**	On some modification of the Mo(011) surface electronic structure by an oxide monolayer
J J Czyżewski, J Krajniak and S Klein	**445**	Investigation of the oxidized (001) tungsten surface by means of ILEED
S Jaskółka, T Radoń, E V Chulkov and O S Koroleva	**449**	Photofield emission spectroscopy of the (111) and (100) tantalum band structure and surface density of states

V V Pogosov	**455**	Toward the theory of metallic clusters: ionization potential and surface energy
M Stęślicka, R Kucharczyk, E H El Boudouti, B Djafari-Rouhani, M L Bah, A Akjouj and L Dobrzynski	**459**	Electronic surface states in GaAs/$Ga_{1-x}Al_xAs$ superlattice: effect of surface location
B Szczepaniak and P Brągiel	**465**	The influence of oxygen adsorption on the electronic structure of copper phthalocyanine
A A Wronkowska and A Wronkowski	**469**	Composite effects in the electronic structure of Au–Pd and Ag–Pd

SEMICONDUCTORS

W Arabczyk, S Hinrich and H-J Müssig	**473**	The reconstruction of the Si(113) surface studied by scanning tunneling microscope
Z Benamara and B Gruzza	**477**	Preparation and characterization of germanium substrates for MIS electronic devices
B Bieg, S Kuźmiński and J Szatkowski	**481**	Influence of etching on the surface properties of $Cd_{0.99}Mn_{0.01}Te$ gallium doped
A Cricenti, L Ferrari, B A Orlowski and B Kowalski	**485**	Luminescence and Franz–Keldish effect on CdTe(110) 1 x 1 surfaces by surface differential reflectivity
Z Czekała-Mukalled, S Kuźmiński and M Tłaczała	**489**	Photoelectronic properties of the GaAs:Si epitaxial layers on the GaAs substrate
B Gruzza, L Bideux, C Robert, G Salace, E Vázsonyi, G Petô, L Guczi and G Gergely	**493**	Interdisciplinary surface studies on porous Si (PSi)—I. Elastic peak electron spectroscopy (EPES), valence band XPS and atomic force microscopy (AFM)
C Jardin, B Gruzza, E Vazsonyi and G Gergely	**497**	Interdisciplinary surface studies on porous silicon (PSi)—II. Cathodoluminescence (CL), Auger (AES), electron energy loss (EELS) and Raman spectroscopy of different PSi samples
S Kuźmiński, K Pater and A T Szaynok	**501**	Influence of production technology on surface properties of $Cd_{0.85}Mn_{0.15}Te$ intrinsic and gallium doped
V G Savitsky and B S Sokolovsky	**505**	Interfacial recombination of current carriers: influence on magnetoconcentration effect in semiconductor heterostructure

THIN FILMS AND INTERFACES

B Adamowicz, M L Grilli, M Pedio, C Ottaviani, A Campo, M Capozi, C Quaresima and P Perfetti	**509**	Inverse photoemission and Kelvin probe studies of the Au/GaP (110) interface
P Biegański, E Dobierzewska-Mozrzymas, M Newelski and E Pieciul	**513**	Fractal dimension of discontinuous copper films
P A Deymier and J O Vasseur	**517**	Electronic contribution to the point defect/curved-interface binding energy. Effect on segregation of curved interfaces
T Lewowski and P Wieczorek	**523**	Photoelectron spectroscopy of thin discontinuous metal films deposited onto a sapphire substrate
P Mazur	**527**	Photoemission investigations of the BaF_2–CaF_2 interface
P Mazurek, Z Mitura, K Paprocki, M Subotowicz and P Mikołajczak	**531**	Direct observation of rare-earth silicide epilayer formation by RHEED technique
M Nowicki and S Mróz	**537**	Properties of ultrathin silver layers deposited on the Cu (011) face
B Stankiewicz	**541**	LCAO study of the density of states of Ge/RbF
J Szatkowski, E Płaczek-Popko, B Bieg, A Hajdusianek and S Kuźmiński	**545**	Electrical characterization of Au Schottky contact on n-type $Cd_{0.99}Mn_{0.01}Te$
J Szuber, B Szczepaniak, S Kochowski and A Opilski	**547**	Electronic properties of the iron phthalocyanine thin films UHV annealed and exposed to oxygen
R Świrkowicz and A Sukiennicki	**551**	Spin waves in ultrathin Fe films

FIELD EMISSION

T Biernat and R Męclewski **555** Surface diffusion coefficient of lithium on the W (112) plane from a measurement of field emission fluctuations

V D Kalganov, N V Mileshkina and S A Sapronov **559** Energy distribution of field-emitted electrons from p-type germanium

V K Medvedev, Yu Suchorski and J H Block **563** Non-linear dynamics of CO oxidation reaction on Pt and Rh as studied with the lithium field desorption microscope

M S Mousa and Yu Suchorski **569** Cold-cathode emission from Cu broad-area electrodes overlayed by resin–ZnO composite

Z M Stępień **575** Surface self diffusion of molybdenum

SPECTROSCOPIC METHODS

A Bukaluk and M Rozwadowski **579** Interdiffusion studies in silver/palladium couples by means of Auger depth profiling

A Cassuto and G Tourillon **583** The interaction of acetonitrile with Pt (111) at 95 K: a NEXAFS study

G Gergely, A Konkol and A Jablonski **587** Differential elastic scattering and backscattering cross sections of H, Si and O in the low energy (2–50 eV) range for electron spectroscopy on porous Si

G Gergely, M Menyhard, K Pentek, A Sulyok, A Jablonski, B Lesiak and Cs Daroczi **591** Experimental determination of the inelastic mean free path for Cu, Ag, W, Au and Ta, in the energy range 500–3000 eV by elastic peak electron spectroscopy and using Ni reference sample

J M Guglielmacci and B Gruzza **595** Influence of the substrate crystallographic orientation on the Auger signal intensity

J Pavluch, J Slezák and D Brechlerová **599** Scattering of electrons in the surface region of solids studied by appearance potential spectroscopy

Z Postawa, Chun He, M El-Maazawi, R Chatterjee, B J Garrison, S Rosencrance and N Winograd **605** Ion-induced emission of excited atoms from (100) surfaces of transition metal single crystals

W Soszka, M Baster, S Kwaśny, P Piekarz and M Soszka **609** A role of multiple scattering in the interaction of low energy ions with a cold Au surface covered by a film of condensed xenon

I S Tilinin, A Jablonski and B Lesiak-Orlowska **613** A theory of quantitative angle-resolved X-ray photoelectron spectroscopy

L Zommer **617** Determination of the spectrometer transmission function for XPS quantitative analysis

VIBRATIONAL PROPERTIES

A Akjouj, M L Bah, E H El Boudouti, B Djafari-Rouhani and L Dobrzynski **621** Surface and interface s-polarised optical waves in superlattices

A V Bertsch, E V Chulkov, S V Eremeev, A G Lipnitskii, G G Rusina and I Yu Sklyadneva **625** Vibrations on the (110) surface of FCC metals

VACUUM DIARY **i**
